Installation & Commissioning Engineer

Do you enjoy traveling, are you technically trained, and are you not looking for a 9-to-5 job? Then you can roll into the maritime world at Alphatron Marine. Step aboard!

Installation & Commissioning Engineer

Travel-loving, hands-on, customer-oriented, and proactive technician

What do we expect from you?

Alphatron Marine supplies high-quality navigation and communication equipment for the maritime sector. As an Installation & Commissioning Engineer, you handle the installation and commissioning of this equipment on board ships and in the workshop. Before you leave for your job, the assignment will be discussed with you so that it is clear what is expected of you. You will get to work using the electrical drawings provided by the Engineering department. Connecting the cabling is a precise job. Naturally, you will receive thorough training for this from your colleagues. Administration is also part of your duties. You have a checklist that you carefully go through. You will visit all kinds of places on board a ship. Sometimes you work at height, and sometimes you work in a confined space. So, plenty of variety! For large projects, you report to and from the client's contact person. One time you work on a ship under construction, and the next you work on an existing ship. You continuously expand your experience. And you follow product-oriented training courses with us. Eventually, you become a specialist in your field.

We work internationally. You can be deployed all over the world. Think, for example, of Singapore, Romania, China, the Middle East, Germany, but you also carry out your assignments in the Netherlands. You spend approximately 10 weeks a year abroad. Usually, you are away from home for 1 to 2 weeks, sometimes a little longer. You love to travel and can manage well on your own, wherever you end up.

What characterizes you?

•MBO diploma in Electrical Engineering Level 3/4;
•VCA certificate (or willing to obtain one);
•Working at Height certificate (or willing to obtain one);
•Interest in the maritime sector;
•Efficient and accurate;
•Good knowledge of atleast English, both spoken and written, Dutch is a pré;
•Willing to work and travel outside office hours.
•Driving license (B);
•Good social and communication skills;
•Stress-resistant;
•Customer-oriented;
•Proactive.

What do we offer you?

•Employment conditions commensurate with your responsibilities;\
•Full-time position;
•Internationally oriented position;
•Expense allowance;
•Average allowance;
•Minimum 32 vacation days;
•Company car that may also be used privately (subject to tax conditions);
•Development opportunities within the company.

Let us introduce ourselves: we are Alphatron Marine

Developments in the maritime world are moving fast. Very fast. But fortunately, so are we. We are here to help companies with innovative solutions that better align with today's technology and capabilities. We create solutions that the market demands and that ships need. We are Alphatron Marine. A renowned supplier of integrated bridge solutions, representative of the industry's leading brands, and producer of unique complementary products. This completely redefines the future of ocean, offshore, and river navigation. Alphatron Marine is an equal opportunities employer. We are strongly convinced that employing a diverse workforce is central to our success. We make recruitment decisions based on your experience and skills. We value your passion for discovering, inventing, simplifying, and building.

We prefer to recruit ourselves, and therefore we do not appreciate unsolicited applications.
